

WORKSHOP ON EXPLOSIVES

46th IPS SEMINAR • 2023

SEPTEMBER,
13th
2023

ST MALO
FRANCE

Correlations between manufacturing processes, microstructure parameters and energetic behavior

This workshop is intended for engineers and researchers interested in energetic materials science and technology.

It will be devoted to the study of the correlations between manufacturing processes, microstructure parameters and energetic behavior (detonics, safety,...).

With the agreement of the authors, the contributions (manuscripts or talks and posters) will be available on-line after the workshop.

This meeting is arranged by the French Alternative Energies and Atomic Energy Commission (CEA).

This workshop will be a special session of the Europyro / 46th International Pyrotechnics Seminar (French journée de la Détonique)

SCIENTIFIC COMMITTEE (construction in progress)

Chairman: Arnaud BEAUCAMP
(CEA)

Deadline for abstracts : 30/11/2022

Deadline for full papers : 31/05/2023

Complete information and
registration forms are
available on :
